

USEcology

Refinery Services

US Ecology delivers cost-effective, compliant waste services to refinery and other petrochemical industry customers, including:

- RCRA, TSCA & non-hazardous waste treatment & disposal
- Chemical oxidation
- Thermal desorption
- Naturally occurring radioactive materials (NORM) disposal

Proven chemical oxidation options provide a cost-effective alternative to incineration for refinery catalysts, tank bottoms and soils.

Patented thermal desorption equipment is another economical option for volatile and semi-volatile compounds, chlorinated solvents, refinery tank bottoms, and other RCRA constituents.

We provide a full range of disposal options for drilling mud, pipe scale, filters and other NORM wastes.

- 1 thermal desorption provides cost-effective treatment of organic compounds**
- 2 bulk and containerized waste handling**
- 3 chemical oxidation a proven, cost-effective option for <500 ppm VOC waste**

Refinery Services

Disposal

US Ecology's RCRA, TSCA and NORM treatment and disposal facilities are strategically located to serve the petrochemical industry.

Texas – Our rail-served Texas facility on the Gulf Coast near Corpus Christi is ideally positioned to serve the refineries, offshore oil rigs, and oil field industries of Texas, Louisiana and beyond.

Idaho – Our rail-served Idaho facility serves a national customer base.

Nevada – Our Nevada facility in the Amargosa Desert primarily serves the California market.

Transportation Services

With a fleet of over 500 gondola railcars and decades of truck, rail, and barge experience, we provide full service transportation from your gate to ours.

Customer Service

Idaho: (800) 274-1516

Nevada: (800) 239-3943

Texas: (800) 242-3209
