

Emergency Response Solutions

Nationwide premier Emergency Response services available 24/7/365.

US Ecology operates with an extensive fleet of specialized equipment and materials, allowing us to handle spills of all levels and types as well as manage emergency spills reliably, professionally and cost effectively.

Nationwide Emergency Response (800) 839-3975

Emergency Response Solutions – 24/7/365

Our highly trained, experienced professionals can handle emergency spills from start to finish, including cleanup, spill reports, waste profiling and analysis, transportation, and disposal. Our crews are available on an immediate response basis to handle catastrophic events nationally or internationally. US Ecology follows all regulatory guidelines required by local, state and federal agencies.

- Nationwide, 24/7/365 service
- Extensive internal resources coupled with a national network
- Small spills to catastrophic events
- Nationwide network of waste disposal facilities
- Follow-up assessment and remediation
- No-fee contract – single invoice

Natural Disaster Response Program

Along with its Emergency Response Program, US Ecology's Natural Disaster Response Program has the resources to help companies recover from catastrophic storm damage. US Ecology Emergency Response provides a "one call" incident response service through its 24/7/365 emergency dispatch line.

Our Emergency Response managers are readily available and trained to coordinate and execute emergency incidents from start to finish.

- Pre-existing versus storm damage evaluation
- Water/moisture intrusion (cause and origin)
- Indoor air quality assessments
- Microbial remediation monitoring and post-remediation verifications
- Residential, commercial or industrial hazardous material cleanup and remediation
