

Total Waste Solutions

A comprehensive, customized approach that optimizes waste operations by ensuring compliance, identifying efficiencies, reducing costs and increasing sustainability.

US Ecology is an industry leader customizing Total Waste Solutions programs that enable you to achieve your environmental goals. Our programs centralize and standardize management of waste across multiple facilities, reducing environmental compliance risk and driving costs savings. Working together, we define cost and waste volume reduction goals in a performance improvement plan and provide progress reports through our industry-leading online reporting portal, COR. Our customized tracking systems provide a consolidated view of waste data across all facilities, positioning you to ensure compliance while improving business and sustainability performance.

In partnership with your environmental, health and safety and operations teams, our team of professionals use an approach rooted in understanding your unique needs to customize solutions that achieve success. We are dedicated to implementing innovative technologies that further reduce overall waste and help you increase sustainability. Backed by over 70 years of experience, a nationwide footprint of treatment, disposal and recycling facilities and industry-leading expertise, we deliver premier environmental solutions.

Industries We Serve

Automotive

Manufacturing

Oil and Gas

Transportation

Utilities and Energy

Key program features include:

- A single source for management of transportation, disposal and recycling of all waste
- Highly-trained and dedicated US Ecology support staff—on-site and off-site
