Our Shared Values

Since 1952, US Ecology has been a leading provider of environmental services, pairing innovative turnkey solutions with unequalled service excellence. We have maintained our position by attracting the best team in the industry, continuously growing our market presence and expanding service capabilities through organic growth and strategic acquisitions.

Building on legacy waste management capabilities, US Ecology is uniquely positioned today to serve our customers as **the industry-leading provider of comprehensive environmental solutions**. Our extensive portfolio offers a best-in-class service network and unmatched capabilities, delivering simple, compliant, and cost-effective solutions for treatment, disposal and recycling of hazardous, non-hazardous and radioactive waste. Our expansive array of complementary field and industrial services provide value added and customized solutions to address our customers' expanded needs. Furthermore, we offer leading emergency response and standby compliance services with certified experts and specialized equipment, delivering 24/7/365 response coverage across North America.

We distinguish ourselves by offering customers the convenience of utilizing one partner to handle all their environmental needs from initial consultation to final disposition of materials, which reduces long-term liability and risk, and ensures compliance.

It is our mission to protect human health and the environment and find solutions for our customers while **operating in a sustainable and transparent manner**. The health and safety of our team members, customers and other stakeholders in the communities we serve are at the forefront of our operations. Across our business, we ensure compliance with State and Federal regulations and deliver services to our customers that feature environmental sustainability.

At US Ecology, our team of industry professionals has a sense of pride in our work, focusing each day on delivering unequalled service excellence and driving the success of the Company. We foster an environment of inclusion, diversity and equity, and invest heavily in the development and engagement of our team, while promoting our shared corporate values of integrity, humility and ethical conduct.

As a trusted partner for our customers, we're committed to going above and beyond what is expected. It is our focus to provide real solutions which support achieving sustainability and Environmental, Social and Corporate Governance (ESG) goals.

US Ecology is powered by our team members and our **mission to protect human health and the environment**. Each day, we live by our virtues of "doing the right thing, the right way" and the commitment to provide unequalled service excellence.

Our **vision is to be the premier provider of comprehensive environmental services**, and our success can be attributed to our team members, from the top down, adhering to our shared values in all aspects of our business.

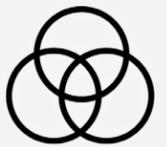

Protecting the Environment

Safety and Compliance

Doing the Right Thing the Right Way

Living the Humble, Hungry and Smart Virtues

Service Excellence

Being a Trusted Partner

Innovative Solutions

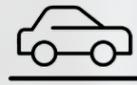

Being "One Team"

We Serve Your Industry

Airport and Aerospace

Customized, award-winning glycol-contaminated stormwater programs for airport customers and advanced treatment, disposal and recycling solutions.

Automotive

Single source services including Total Waste Management solutions for transportation, recycling, treatment and disposal of commercial, universal, industrial and hazardous waste.

Education

Certified field chemists perform time-saving and cost-effective lab pack services for disposal of unneeded, out-of-date or unknown chemicals.

Engineering and Consulting

Streamlined management of environmental projects through a single source of experts in remediation, transportation, treatment and disposal.

Government and Municipalities

Technologically advanced solutions for customers with Pack Back Programs, Remediation and Industrial Services, Emergency Response and Household Hazardous Waste collections.

Healthcare

Responsible and secure management and disposal of healthcare waste by certified professionals, safely transported to DEA/RCRA-permitted and VAWD accredited facilities.

Pharmaceutical

Strict handling and disposal of OTC, controlled and hazardous pharmaceuticals through customized solutions designed to reduce generator status while adhering to regulations.

Refining, Petrochemical and Chemical

Nationwide locations and new technologies offer customers metals Recovery, Delisting, Transportation, Industrial Cleaning and maintenance, Emergency Response, Equipment Rental and Hazardous Waste Disposal services.

Transportation

An extensive fleet of specialized equipment handles emergency spills, waste transportation, disposal, recycling and industrial cleaning - all performed by DOT-certified technicians.

Retail

Our team of dedicated professionals build customized retail programs focused on safely managing hazardous waste to help you meet compliance goals and eliminate fines while minimizing cost and operational interruption.

Steel, Metal Finishing

Streamlining treatment and disposal efficiencies in the steel and metal finishing industries with Metals Recovery, Liquid and Dry Vacuum Services, Tank Cleanings, Hydroexcavation, Delisting, Container and Equipment Rentals.

Utilities and Energy

Innovative and highly responsive waste treatment and disposal solutions allowing utilities and energy customers to maintain regulatory compliance and continuously power the nation without interruption.

How We Help Customers Like You

Senior Environmental Engineer, Koch Industries

"We've traditionally had many service issues with multiple waste vendors. Recently, some of our facilities have implemented e-waste recycling into industrial operations through US Ecology as a single waste management vendor. In doing so, sites can now better align incentives and drive down the real and opportunity costs associated with waste disposal."

John Determan, JCU International Inc.

"The US Ecology team could not have been more courteous and professional. Both chemists worked with us to sort and process the order, and let us know that they were coming beforehand. US Ecology arrived on time as promised and had a very even keel about them. I would love to have employees like theirs on my team."

Clayton Underwood, Flint Group

"The US Ecology crew was well trained and very professional throughout the introduction, planning, execution, and clean up."

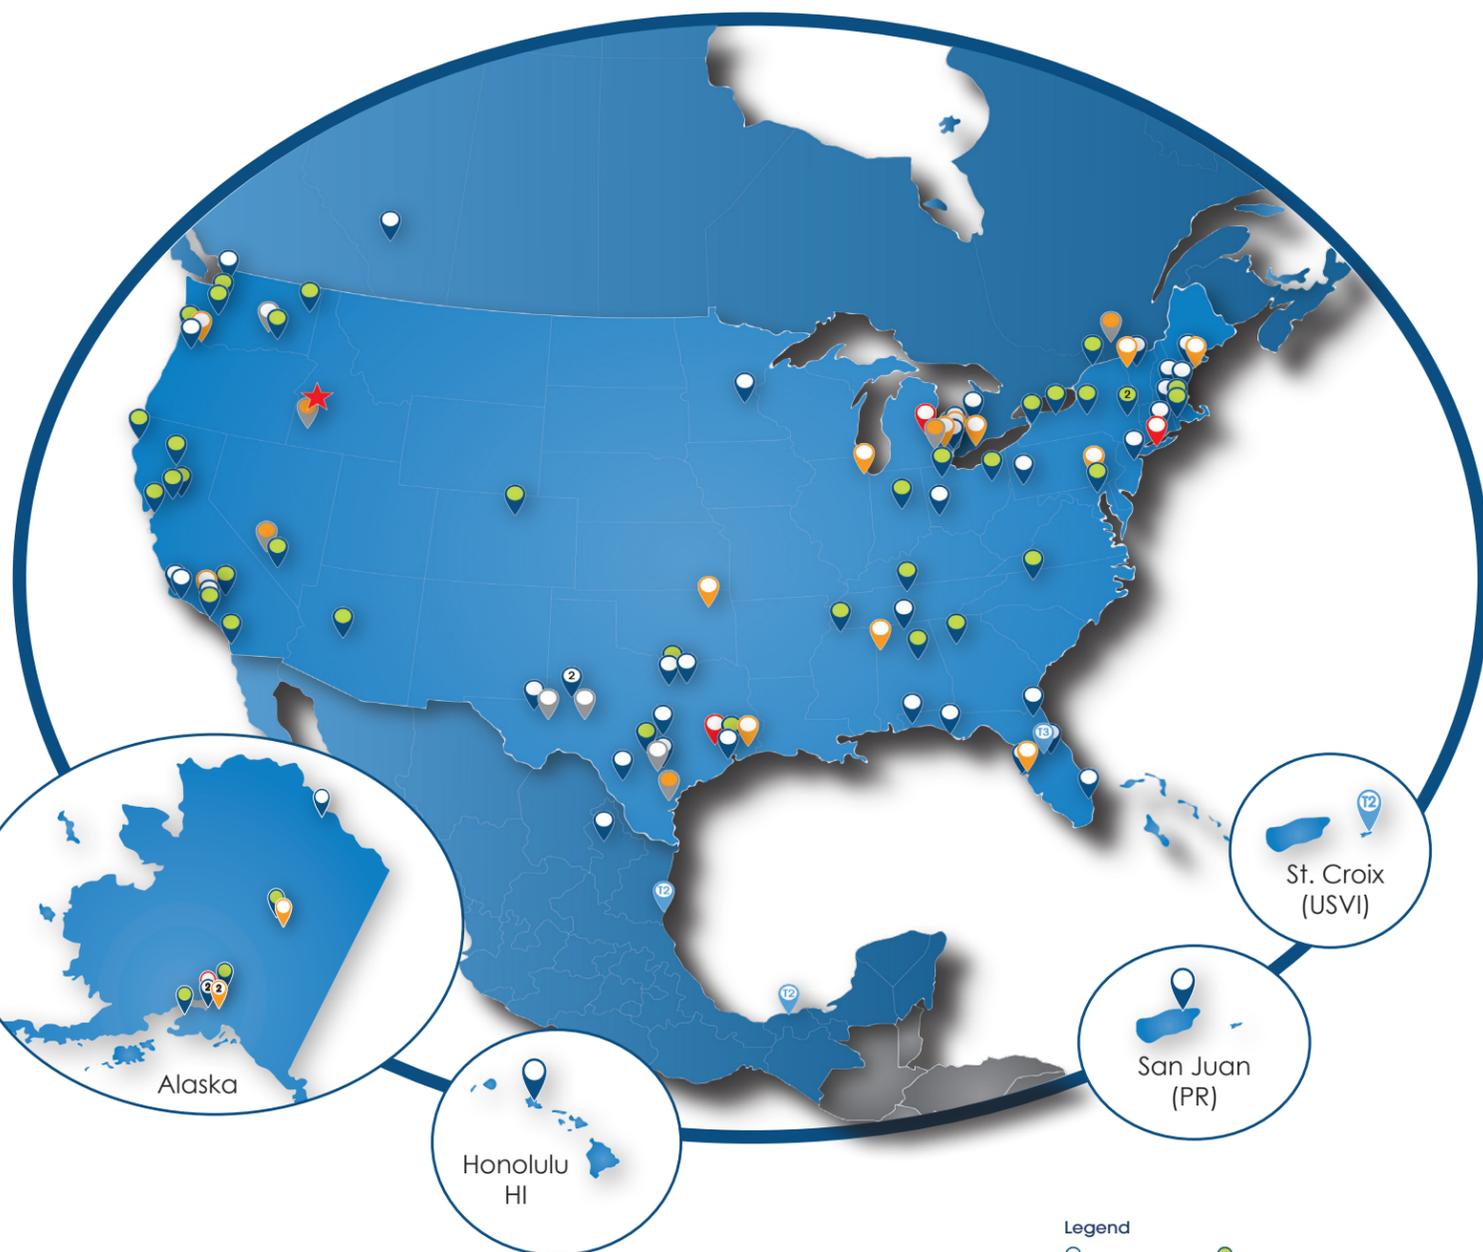

Senior Compliance Manager, National Supermarket Chain

"My stores continue to operate efficiently and without interruption thanks to the service and value of our US Ecology partnership. Choosing to partner with US Ecology has been one of the smartest decisions we could have made to do our part in protecting the health and safety of our business, our employees and our communities."

Our Global Service Network

Our footprint of state of the art facilities allows us to safely and efficiently support all your environmental and emergency response needs with locations in the United States, Canada, Mexico and across the globe.

- 3400+ Team members
- 34 Permitted facilities and secure disposal sites
- 5,000+ Global Response Resources
- 130+ Locations worldwide

Additional locations in the United Kingdom, Turkey, Georgia and the United Arab Emirates.

Meeting the Needs of Customers and Providing Unequaled Service Excellence for 70 Years.

Providing our customers a best-in-class customer experience is fundamental to our goal of offering the industry's premier environmental and emergency response service.

Our team of highly trained customer service professionals is dedicated to this goal. We pride ourselves in providing responsive and knowledgeable service

seeking to support our customers' needs by engineering innovative solutions that you can trust.

With one phone call you can reach our service representatives who will work with you to quickly and efficiently deploy the right resources and design the best solution to meet your environmental needs.

Customer satisfaction score of 95%

COR: The Difference Maker in the Industry

US Ecology's Customer Online Resource (COR) platform is an online application that allows customers to manage their industrial services and environmental waste needs from any device. Through a secure single point of entry, you will experience COR's comprehensive and interactive dashboards which streamlines many of the functions and reporting features necessary to effectively manage your waste services, enabling you to easily and efficiently manage your account.

Safety 360

US Ecology is committed to surrounding our employees with a safe and healthy workplace. Our Safety360 program recognizes the importance of providing our employees, contractors and visitors the knowledge to maintain a safe work environment. It emphasizes the cycle of continuous improvement and provides the tools for employees to proactively recognize and control the hazards around them.

Health and Safety excellence is a fundamental value at US Ecology and a priority across all of our operations. We are committed to fostering a culture of safe practices and providing and maintaining a safe work environment for our team members, customers and the communities where we operate. By managing what we can control before an incident occurs and systematically investigating all events and near-misses, our operations have been able to reduce incident rates and the potential for repeats.

We work closely with our customers to identify potential health and safety risks involved with each project and all associated waste streams. US Ecology expects every team member to adhere to safe work practices and current procedures, as well as comply with all health and safety laws and regulations. Our Environmental Health and Safety staff has developed policies, procedures and key initiatives designed to further our safety excellence goals and drive employee engagement. Our team members believe that safety is a core value and understand what it takes to guarantee safety at work and at home.

Total Recordable Incident Rate (TRIR)

Sustainability for a Better Tomorrow

ESG Report

Environmental sustainability requires responsible interactions to avoid depletion or degradation of natural resources, as well as proactive protection of our environment over the long term. Improper waste management and chemical releases can expose our communities to unacceptable risks and harm natural ecosystems. We identify environmentally focused solutions

that achieve regulatory compliance, while offering customers sustainable alternatives via new waste reduction, recycling or reuse technologies. These compliant and safe technologies allow customers the opportunity to achieve ESG performance improvements, while protecting the communities in which they work and live.

US Ecology understands the pressures customers are under today to conduct business in a way that reduces environmental impact and supports social and cultural objectives, all while needing to achieve their business goals. That is why our dedicated sales and customer service teams work in partnership with customers to understand their environmental needs, appreciate their sustainability goals and ultimately, find innovative, customized solutions that work.

1,724,406 cans of Aerosols recycled

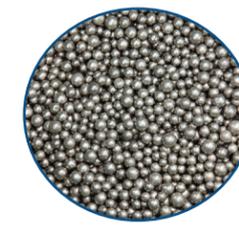

5,107,833 pounds of Glycol recycled

56,982,769 gallons of Hazardous Wastewater treated

1,974,970 gallons of Oil recycled

25,706,000 pounds of Metals recovered

Treatment and Disposal Services

US Ecology's large network of owned and operated treatment and disposal facilities throughout North America offers simple, safe and cost-effective solutions for all your hazardous and non-hazardous waste streams including PFAS, PCBs, NORM/TENORM radioactive, inorganic, metal and industrial waste. We provide flexible waste management solutions for all your waste needs including secure disposal in RCRA subtitle C and TSCA permitted facilities.

Acceptance of 600+ federal and state waste codes

Unequaled service excellence

Advanced treatment technologies

Transparent pricing

Hazardous and non-hazardous waste disposal

Compliance and safety

[Secure Disposal](#)

US Ecology is the disposal leader offering the widest range of disposal solutions for hazardous and non-hazardous waste streams through a nationwide network of owned and operated disposal facilities.

[Solid Waste Treatment](#)

We specialize in hazardous and non-hazardous waste management, providing essential treatment services for hazardous and non-hazardous solids, sludges and debris with the largest waste treatment and disposal capacity in the industry.

[Wastewater Treatment](#)

Our comprehensive hazardous and non-hazardous wastewater management provides environmentally safe solutions.

[Deep-Well Injection](#)

Utilizing injection technology, our non-hazardous deep-well disposal offers a cost effective alternative to traditional wastewater treatment. This type of disposal is ideal for all Class 1 and Class 2 non-hazardous industrial waste

[PCB Waste Services](#)

We provide safe and compliant disposal solutions for TSCA waste.

[PFAS Solutions](#)

US Ecology offers a variety of solutions to safely manage and securely dispose of PFAS contaminated waste to protect the environment throughout North America. Achieve compliance and peace of mind with safe and secure solutions that isolate the PFAS molecule and end the mobility cycle.

[Radioactive Waste Solutions](#)

As the nation's most experienced radioactive waste company, we provide customers with cost-effective, safe and secure disposal of low-level and low-activity waste.

[Waste Transportation](#)

An extensive fleet of licensed waste hauling vehicles manages your waste from point of generation to final disposition, minimizing your cost and liability.

[Energy Waste Disposal](#)

Our state-of-the-art, oil and gas-specific waste treatment, recovery and disposal landfill operations are ideally located to serve all your waste disposal needs.

[Thermal Solutions](#)

With thermal treatment technology, we provide regulatory compliant thermal treatment of non-hazardous contaminated soils and sediments in Alaska.

Learn More

Recycling Services

US Ecology's network of facilities and service centers provide recycling services for everything from organic, to metals and universal waste. We customize our recycling programs to fit your specific needs while meeting regulatory requirements and helping protect the environment.

Protecting human health and the environment

Customized programs that fit your needs

Compliance and safety

Aerosol Recycling

Our patent-pending aerosol recycling technology is the first in the U.S. to recycle 100% of the can and its components with zero emissions while being landfill free.

Alaska Recycling

US Ecology owns and operates the most extensive and comprehensive fixed facilities for managing environmental projects in all of Alaska and is unrivaled for our ability to manage recovered spilled products, non-regulated wastes and automotive fluids.

Thermal Recycling

Our thermal desorption technology offers a more sustainable and cost-effective solution over incineration or other management methods for recoverable organic wastes.

Metals Recovery

Metals Recovery reclaims valuable metal residues from selected waste streams, providing a sustainable alternative to traditional disposal methods. Our recycling technologies economically recover metals resulting in a significant benefit for the environment and our customers.

NMP Recycling

US Ecology offers a recycling program to manage spent N-Methyl-2-Pyrrolidone (NMP), a non-hazardous solvent used in the lithium-ion battery manufacturing process.

Glycol Recovery

Using state of the art distillation technology allows us to receive the used glycol that is generated through automotive, mechanical, industrial and aviation industries and distill it back to virgin equivalent glycol as a base for our various ethylene and propylene glycol products.

Pack Back Program

A Pack Back Program is the answer for safe and compliant handling and recycling of all your universal wastes.

ELVS Mercury Switch Program

Our National Vehicle Mercury Switch Recovery Program collects, transports, retorts and recycles elemental mercury from automotive switches.

Used Oil

Through our used oil recycling program we can recycle all types and concentrations of used oil into reusable resources.

Industrial Services

Turnkey services that reduce your liability and protect your assets. Our experienced service professionals are equipped with the latest equipment and training to safely and efficiently address even the most complex projects for our customers.

Latest equipment and professionally trained team members

Customized solutions for small to complex projects

Turnkey service including waste disposal

Industrial Cleaning and Maintenance

Our fully trained, certified and experienced technicians utilize an extensive fleet of specialized equipment and materials to handle all levels and types of cleaning. We also provide experienced workforce that specializes in all aspects of manned and non-manned confined space entry and rescue for tank and vessel cleaning.

Equipment Cleaning

US Ecology's equipment cleaning service saves time and reduces liability by pairing equipment cleaning with safe and compliant disposal of waste residuals.

Gun Range Cleaning

Our highly trained professionals provide worry-free support for all of your gun range cleaning and hazardous waste management needs.

Marine and Terminal Services

Our Marine and Terminal Services focus on the response and industrial services needs of maritime shipping, port authorities, tug and barge operators, ports and marinas and entities within the DOD and DOT. Our project teams have decades of experience performing industrial, remediation and emergency response services within terminals.

Energy Waste Solutions

US Ecology is the premier provider of comprehensive Energy Waste Solutions (EWS) for E&P companies, strategically located with multiple treatment, disposal and service centers facilities throughout the most active oil and gas producing regions of Eagle Ford and Permian Basins. Our facilities offer turnkey oilfield disposal, oil rig waste recycling, and industrial services at any hour, day or night.

Asbestos Abatement

US Ecology routinely performs abatement of friable and non-friable asbestos and other regulated building materials including lead, gypsum, mold, heavy metals, PCB and guano to support industrial cleaning and maintenance, renovation and demolition projects.

Equipment Rental

We have been providing equipment rentals to industrial transporters, manufacturers, automotive suppliers, chemical processors, refineries, power plants and many other industries for over 16 years.

Learn More

Field Services

Let our experts support your on-site environmental needs with a wide variety of field services. Our highly trained professionals, state of the art IT systems and transportation assets, combined with our industry leading disposal capabilities enable us to provide you the support you need.

Latest equipment and professionally trained team members

Targeted solutions for a variety of market needs

Industry-leading disposal capabilities

Total Waste Management

Our customized Total Waste Management programs offer large industrial companies a turnkey, centralized waste management solution, tied to their specific environmental goals. Reduce cost, minimize waste, increase and improve data to manage your program and improve sustainability as you consolidate management of your waste with one vendor, and one single point of contact.

Retail Solutions

We offer customized programs that focus on safely managing hazardous waste achieving compliance goals and eliminating fines while minimizing cost and operational interruption for supermarkets and grocery stores, pharmacies and drugstores, convenience stores and gas stations, department stores, home-improvement stores, discount general stores and more.

Less Than Truckload

Our DOT-certified technicians drive an extensive network of nationwide Less Than Truckload (LTL) service routes to support customers with small quantity waste management needs.

Lab Pack

We offer turnkey, time-saving and cost-effective options for disposal of unneeded, out-of-date or unknown chemicals in your classrooms, laboratories or storage closets. With very little work on your end, our professionally trained field chemists will arrive on site and on time. We will help you achieve compliance and protect you from costly, complicated and dangerous waste handling mistakes.

Remediation

We provide remediation packages to engineering and consulting firms and have successfully completed hundreds of environmental projects ranging from low-level radiation decontamination and excavation to on-site remediation, treatment and removal of contaminated soils and landfill closures. We manage remediation projects from start to finish and offer the only integrated environmental services and disposal package in the industry.

Household Hazardous Waste

US Ecology is a proficient Household Hazardous Waste (HHW) management contractor that has significant experience working with municipalities across the country.

Learn More

Emergency Response Services

US Ecology has been a leader in providing reliable and compliant emergency response solutions for over 30 years. Our national and global response programs with fully integrated services, including waste disposal, offer the convenience and reduced risk of working with a single trusted partner. When disaster strikes, you can depend on our experienced experts 24/7/365 to provide unequalled service that minimizes environmental and operational impact of any event.

Nationwide coverage available 24/7/365

Your partner from start to finish

Spill Response

US Ecology maintains a constant state of readiness with certified experts and specialized equipment, providing unmatched 24/7/365 response coverage across North America for incidents at facilities, businesses, on land, in the water, over the road and on rail. We serve the transportation industry and a variety of other sectors including public agencies and private sector clients in the chemical, manufacturing, oil and gas, retail and insurance industries.

Disaster Response

Being prepared for natural disasters and other catastrophic events can minimize their impact to your operations and make all the difference in how quickly you're back up and running. US Ecology is here to help you plan for the unexpected and protect your assets with industry leading services provided by the most trusted and experienced disaster response professionals.

High Hazard and Rail Response (SRS)

SRS, a US Ecology company, provides international response services for highly hazardous and volatile events such as train derailments, well and pipeline emergencies, ship fires, over-the-road incidents, industrial fires, clandestine drug labs and WMD events and drills. SRS personnel are renowned for their expertise in managing large scale emergencies involving all classes of hazardous materials and dangerous goods.

Oil Spill Response and Compliance (NRC)

NRC, a US Ecology company, is the world's largest commercial OSRO and the only private contractor to hold MMPD, WCD1, WCD2 and WCD3 classifications from the United States Coast Guard, meeting federal oil spill response requirements in the Inland, Rivers/Canals and Ocean environments. We offer unparalleled marine and land response capabilities to customers in a variety of industries.

COVID-19 Decontamination

Protect your business and achieve peace of mind with a multi-faceted COVID-19 service plan customized for your operations. Safely reopen and resume business operations with a customized plan designed to protect the health and safety of your workforce by reducing the risk of additional exposure and contagion.

Consultancy and Training

Delivered by leading experts with first-hand knowledge of real life emergency situations, our consultancy and training services include emergency response planning, drill and exercise management, safety and health audits and a comprehensive range of training in the areas of oil spill and hazardous material response and emergency incident management.
