Re: Final Federal TSCA PCB Commercial Storage Approval, Michigan Disposal Waste Treatment Plant, Belleville, Michigan, MID000724831

Dear Mr. Durnen:

Enclosed is the final federal Toxic Substances Control Act (TSCA) polychlorinated biphenyls (PCBs) commercial storage approval for the Michigan Disposal Waste Treatment Plant (MDWTP) facility located at 49350 I-94 Service Drive, Belleville, Michigan. The PCB commercial storage approval is issued pursuant to 40 Code of Federal Regulations (C.F.R.) § 761.65.

On June 7, 2018, the U.S. Environmental Protection Agency issued the draft federal TSCA approval for public comment. The draft federal TSCA approval was publicly noticed in the Belleville Independent on June 7, 2018. A copy of the draft federal TSCA approval was available for review at the Belleville Area District Library and on the EPA website. In addition, EPA mailed fact sheets to the mailing list established by the Michigan Department of Environmental Quality (MDEQ) for the MDWTP facility. The public comment period was open through July 10, 2018. EPA did receive comments from the public on the approval and those comments were addressed in letters and emails which were sent directly to the commenters. The comments did not affect the conditions of the approval. EPA is now issuing MDWTP a final TSCA approval.

This approval may be withdrawn, or further conditions may be added to it at any time, if EPA has reason to believe that operation of the storage facility represents an unreasonable risk of injury to human health or the environment. EPA reserves all of its rights in this matter, including the right to revoke this Approval, in part or in full, should it be determined that any information, data and/or statement in the subject TSCA application, or otherwise provided to the Agency in this matter, was false or inaccurate, and, thereby, render such decision null and void. Withdrawal of this authorization or the imposition of further conditions may also result from future EPA rulemaking or development of guidance with respect to PCBs. Moreover, violation...
of any conditions included as part of this authorization may subject MDWTP to an enforcement action and/or the termination of this approval.

It is the responsibility of you and your company, MDWTP, to ensure that all applicable provisions of TSCA and the federal PCB regulations are followed. Violation of any of the applicable provisions may be cause for rescission of this approval. Furthermore, this approval does not relieve MDWTP of the responsibility to comply with all other Federal, State and local regulations and ordinances for transportation, siting, operation and maintenance of its facility.

EPA reserves the right for its authorized representatives to observe MDWTP storage activities and inspect records that the company is required to maintain under the federal PCB regulations and this approval, during normal operation and at other reasonable times.

If you have questions concerning the final federal TSCA approval, please contact Lisa Graczyk, of my staff, at (312) 353-3219.

Sincerely,

Tinka G. Hyde
Division Director
Land and Chemicals Division
