Table III.A  
Waste Management Information

Table III.A. - Waste Management Information

Waste	Source	Volume (tons/year)
Non-hazardous inorganic liquids	Various Generators	Volume can vary year to year for a commercial facility
Non-hazardous organic liquids	Various Generators	Volume can vary year to year for a commercial facility
Non-hazardous inorganic solids	Various Generators	Volume can vary year to year for a commercial facility
Non-hazardous organic solid	Various Generators	Volume can vary year to year for a commercial facility
Non-hazardous inorganic sludges	Various Generators	Volume can vary year to year for a commercial facility
Non-hazardous organic sludges	Various Generators	Volume can vary year to year for a commercial facility
Non-Hazardous municipal landfill leachate	Various Generators	Volume can vary year to year for a commercial facility

Note: US Ecology Winnie is a commercial facility that receives non-hazardous industrial waste from numerous generators. A complete list of all possible waste streams that could be received would be difficult but all waste received will fall into one of the three categories identified in the table.
