

Commitment Statement

Environment

Intent

US Ecology is committed to operate in a manner that is protective of human health and the environment. We strive to be a trusted advisor to our customers and do the right thing, the right way.

Commitment

- Maintain and demonstrate compliance with all applicable federal, state, and local environment statutes, regulations, agreements, permits and licenses.
- Train team members on applicable environmental requirements and best practices, while promoting personal accountability and recognition for our team members actions.
- Conduct rigorous internal environmental assessments and audits to assure compliance.
- Be an environmentally responsible neighbor in the communities where we operate and act promptly to correct incidents or conditions that have potential to endanger the land, air or water.
- Work cooperatively with our regulators to ensure US Ecology is aligned with the expectations of our regulators, and
- Continually improve our environmental management programs and performance.
