

Introduction

This guidance document was prepared to assist in completing US Ecology’s Used Oil Supplement. The Waste/Material Profile Form (WMPF) and its supplements provide the necessary information to safely and compliantly manage our customer’s waste/material. Completing all documents thoroughly aids in expediting the approval process. Current copies of the WMPF and supplements are available on US Ecology’s website (www.usecology.com).

For specific waste/material acceptance questions and/or instructions for US Ecology facilities outside of the United States, please contact our customer service team at 800-592-5489.

Continued from question F16

1	<ul style="list-style-type: none"> ➤ Indicate if the total halogen content of the used oil is >1,000 ppm. Used oil containing more than 1,000 ppm total halogens is presumed to be a hazardous waste under the rebuttable presumption for used oil in 40 CFR 279.10(b)(1). ➤ If “yes”, continue to question 2. ➤ If “no”, the supplement is complete.
2	<ul style="list-style-type: none"> ➤ Indicate the source of the halogens. Persons may not rebut the hazardous waste presumption in certain situations. <ul style="list-style-type: none"> • A metalworking oil/fluid containing chlorinated paraffins. • Used oil contaminated with chlorofluorocarbons from refrigeration units. • Specific halogenated solvents can be listed. • Other source. Describe, if applicable.
